Subject: Senate Bill 975

Dear Representatives Lund, Petroskey and Brown,

Please do let SB 975 go forward. This bill would allow health care providers, facilities, and insurers to deny care based on religious, moral, or ethical objections. There are no provisions to ensure patients' rights are protected.

The bill language is so broad that any service could be denied such as vaccines or blood transfusions. Under this law, anyone could be denied birth control, emergency contraception, STD treatments.

This bill threatens MY health. Please stop it now.
